

# HOW TO . . . .

## succeed with CLIMBING & WALL PLANTS

*This decorative group of plants provide a moving, ever-changing part of your garden design. Trailing, rambling, twining or clinging, these energetic plants grow up, down and outwards, while at the same time they provide large splashes of colour and beauty in those awkward gaps in your garden where ordinary plants are unable to reach.*

### Planting Against A Wall

- 1 Wall, fence or post.
- 2 Top of plant's root ball at least 5 cm below soil level.
- 3 Soil level.
- 4 Base of plant at least 35 cm from base of wall.
- 5 45 cm.
- 6 45 cm.
- 7 Main base roots slightly loosened.
- 8 Garden compost or rotted manure.
- 9 Mixture of loam, peat and bonemeal.
- 10 Sides and base of hole broken up.
- 11 Small plant to shade roots.

### Planting against a Tree

- 1 Strong cane leading shoots to tree trunk.
- 2 Additional support.
- 3 Soil level.
- 4 Top of plant's root ball at least 5 cm below soil level.
- 5 Mixture of loam, peat and bonemeal.
- 6 Sides and base of hole broken up.
- 7 Garden compost or rotted manure.
- 8 Main base roots slightly loosened.
- 9 45 cm.
- 10 45 cm.

Plant Description	Common Name	Flower Colour	Plant Description	Common Name	Flower Colour
CELMATIS Varieties	Old Man's Beard	Various	LATHYRUS LATIFOLIUS	Perennial Sweet Pea	Pink
HEDERA CANARIENSIS	Ivy	Variegated	PARTHENOCISSUS HENRYANA	Virginia Creeper	Red
